

AP Psychology

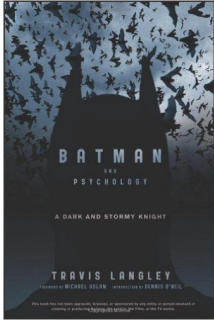

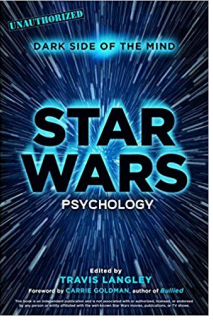

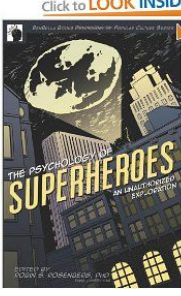

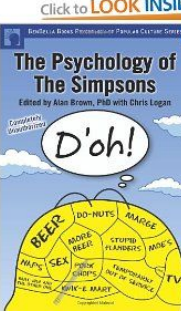

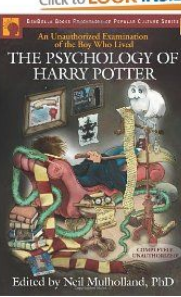

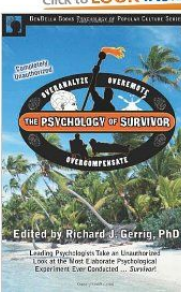

2018 Summer Assignment

Psychology is a tree with many different branches. Each of the following collections of essays are written by experts in their respective field of psychology. The essays offer an excellent introduction to the variety of topics that we will cover in class next year. Prepare for your study of psychology by [reviewing](#) and [outlining](#) the essays from one of the following books.

Consider the following as you read the essays:

1. List about three **psychological terms** from each essay and their definitions.
2. List about one **name** and contribution of an important psychologist from each essay.
3. After reading outlining the entire book, write a paragraph for each of these questions:
 - a. How do these ideas help you to understand yourself and others in your own life?
 - b. What is psychology?

<p><u>Batman and Psychology:</u></p> 	<p><u>Star Wars Psychology</u></p> 
<p><u>The Psychology of Superheroes</u></p> 	<p><u>The Psychology of the Simpsons</u></p> 
<p><u>The Psychology of Harry Potter</u></p> 	<p><u>The Psychology of Survivor</u></p> 

Save Money: Kindle editions for each are about \$2.99, and you can read the book on your computer if you don't own a Kindle!

Turn in your Outline by **the second day of class** via email or share a Google Doc with: jclarkevans@fredericksburgacademy.org

Use these essays to begin to learn the language of Psychology and to start thinking like a psychologist. I hope that you enjoy the book you choose. Have a great summer!

~Mrs. Clark Evans
